

## April 30th, 2020 Newsletter update from the Montana Osteopathic Medical Association (MOMA)

---

Hello, again from MOMA. Those of you who have given us your email address should have received our last newsletter from earlier this year. We are enclosing it again with this update and snail mail correspondence.

August 13-16, 2020 MOMA Primary Care Roundup: COVID-19 has certainly changed things for all of us, and in ways yet to be determined. However, MOMA was planning on live, virtual access to our CME program this year, attempting to provide education for those of us in Montana, but also for those a long way from Billings and out of state attendees. So, with COVID-19, this has become more of an issue. There were efforts before COVID to provide more CME online, so it has accelerated this online access to education, which, over time, will hopefully be a permanent part of our CME, knowing that there still should be live, on-site CME for all the benefits that it provides. The conference will also be recorded for access for 2-3 years on a platform (DOCME) developed by the state AOA affiliates. To give you a sneak peek, the agenda is on the back of this newsletter. You can also go to our website: [www.mtosteopaths.com](http://www.mtosteopaths.com) for the agenda/brochure, which will be available by May 15th. (Our other website address: mtoma has problems since we updated our website but should work again in the near future.) If you are receiving this newsletter via snail mail, this info should also be coming to you first as a reminder, then with the actual brochure over the next few weeks. As in years past, registration for the conference will be available at [www.billingsclinic.com/cme](http://www.billingsclinic.com/cme).

Also enclosed is our dues statement and return envelope, for the fiscal year July 1, 2020 to June 30th, 2021. We thank those of you who for years have supported us with dues, and please understand that I keep good records on who has paid dues, but do not send out a receipt. (As mentioned, the # of DO's in Montana is relatively small - about 300 practicing, so we are growing and hope to have someone at least part time to take care of more of these issues). Most of our activity continues to be providing quality CME, but there are other issues that require an association to have a collective voice for our profession. And, as the last newsletter included in this email states, our profession has a chance to influence the practice of medicine in a positive way. So, your support is most appreciated. We have a strong group of officers and board of directors, there are links to this and other issues on our website.

Looking forward to seeing you, or being seen by you in August. And those of you western Montana DO's, this is your chance (first chance) to attend our conference live without driving to Billings!

Hope all is well, and if we are not at the point to have the live, onsite CME, it will be done live and virtually.

Don Grewell, DO  
Executive director, MOMA
